

# Built Environment and Social Equity

## A STAR assessment of 3 King County station areas

Rachel Miller  
rachelm@makersarch.com

**MAKERS**

architecture • planning • urban design

**King County**

## PSRC's Existing Conditions Report and Community Typology study

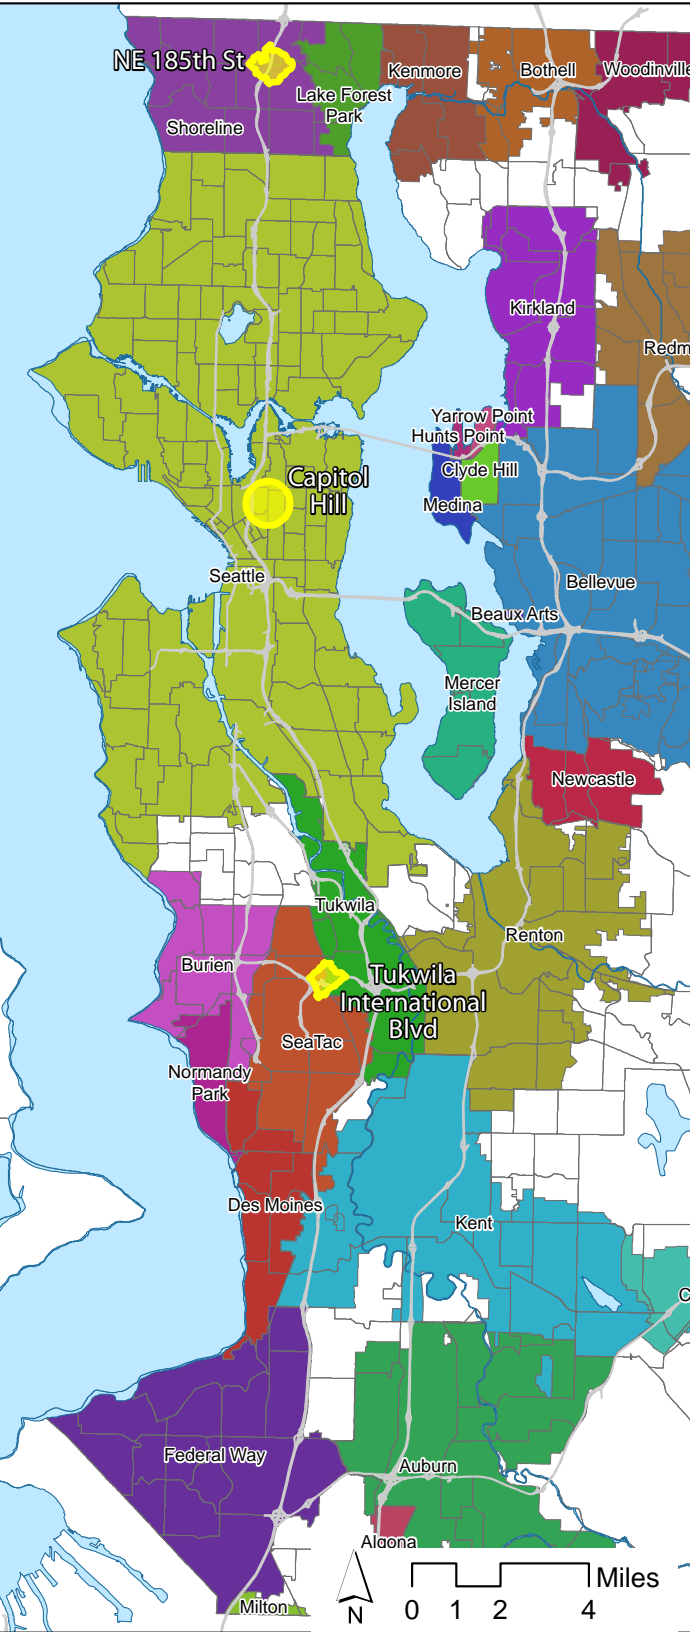

# Thank you!

- Hilary Franz, Scarlett Ling, and Wren McNally, *Futurewise*
- Richard Gelb, *King County*
- Michelle Caulfield, *Seattle*
- Kristin Lynett, *Tacoma*
- Andrea Peet, *STAR Communities Rating System*

*Note: This presentation uses data from these jurisdictions or organizations, but the views and opinions expressed here are my own and do not necessarily reflect their policies or positions.*

# The study's intention

- Highlight relationships between built environment characteristics and equitable services and access
- Case studies: Use the STAR rating system to evaluate 3 station areas:
  - Shoreline 185th
  - Capitol Hill
  - Tukwila International Boulevard

# Why these study areas?

- Receiving public investment, changing
- King County, Shoreline, Seattle, and Tukwila using STAR framework
- Each representative of a different type of community

**SET GOALS.  
MEASURE PROGRESS.**

# STAR Communities

- First national framework and certification program for measuring community sustainability (released in 2012)
- Led by ICLEI-Local Governments for Sustainability, the U.S. Green Building Council, National League of Cities, and the Center for American Progress
- 200+ volunteers over 4-year process
- Still in pilot stage

# Goals, objectives, & measures

Goal

Built Environment	Climate & Energy	Economy & Jobs	Education, Arts & Community	Equity & Empowerment	Health & Safety	Natural Systems
Ambient Noise & Light	Climate Adaptation	Business Retention & Development	Arts & Culture	Civic Engagement	Active Living	Green Infrastructure
Community Water Systems	Greenhouse Gas Mitigation	Green Market Development	Community Cohesion	Civil & Human Rights	Community Health & Health System	Invasive Species
Compact & Complete Communities	Greening the Energy Supply	Local Economy	Educational Opportunity & Attainment	Environmental Justice	Emergency Prevention & Response	Natural Resource Protection
Housing Affordability	Industrial Sector Resource Efficiency	Quality Jobs & Living Wages	Historic Preservation	Equitable Services & Access	Food Access & Nutrition	Outdoor Air Quality
Infill & Redevelopment	Resource Efficient Buildings	Targeted Industry Development	Social & Cultural Diversity	Human Services	Indoor Air Quality	Water in the Environment
Public Spaces	Resource Efficient Public Infrastructure	Workforce Readiness		Poverty Prevention & Alleviation	Natural & Human Hazards	Working Lands
Transportation Choices	Waste Minimization				Safe Communities	

Objective

*Within each objective, the indicators are "outcome measures" and "action measures."*

# Focus objectives

Built Environment	Climate & Energy	Economy & Jobs	Education, Arts & Community	Equity & Empowerment	Health & Safety	Natural Systems
Ambient Noise & Light	Climate Adaptation	Business Retention & Development	Arts & Culture	Civic Engagement	Active Living	Green Infrastructure
Community Water Systems	Greenhouse Gas Mitigation	Green Market Development	Community Cohesion	Civil & Human Rights	Community Health & Health System	Invasive Species
Compact & Complete Communities	Greening the Energy Supply	Local Economy	Educational Opportunity & Attainment	Environmental Justice	Emergency Prevention & Response	Natural Resource Protection
Housing Affordability	Industrial Sector Resource Efficiency	Quality Jobs & Living Wages	Historic Preservation	Equitable Services & Access	Food Access & Nutrition	Outdoor Air Quality
Infill & Redevelopment	Resource Efficient Buildings	Targeted Industry Development	Social & Cultural Diversity	Human Services	Indoor Air Quality	Water in the Environment
Public Spaces	Resource Efficient Public Infrastructure	Workforce Readiness		Poverty Prevention & Alleviation	Natural & Human Hazards	Working Lands
Transportation Choices	Waste Minimization				Safe Communities	

# Compact & Complete Communities (CCC)

## Choose CCCs

- # determined by population  
(e.g., KC at 2 mil - 10 CCCs,  
Seattle at 635,000 - 8 CCCs)
- 1/2 mile walk areas around strong
  - mix of uses,
  - transit availability,
  - density, and
  - walkability,
  - while maintaining geographic diversity
- Built off of LEED ND

# Compact & Complete Communities

## Outcomes

1. Density, destinations, & transit
2. Walkability
3. Design
4. Affordable housing

## 10 local actions

- Policies and regulations
- Programs (e.g., design review, affordable housing)

# Equitable Services & Access

## Outcome: Access & proximity

- Determine local priority areas  
(based on income, race/ethnicity, and/or lack of resources)
- Demonstrate increased access to:
  - Transit
  - Libraries
  - Schools
  - Public spaces
  - Healthful food
  - Health and human services
  - Digital/high speed internet
  - Urban tree canopy
  - Emergency response times

**8 local actions** (e.g., equity plan, reduce disparities, construction)

# Community Benefit Equity Assessment by Income - Forest Canopy

American Community Survey '05-'09  
reported by census tracts

Annual Income per Capita (US\$)

Category	Per Capita Income Range (US\$)	Count Census Tracts	Total Population	Forest Canopy (%)	Average Forest Canopy (%)
1	Up to \$24000	57	272,164	14.87	14.09
2	\$24001 - \$30000	63	335,556	24.14	23.91
3	\$30001 - \$35000	56	293,515	54.78	28.29
4	\$35001 - \$41000	62	305,113	51.87	31.28
5	\$41001 - \$49000	72	329,266	61.43	31.45
6	More than \$49000	63	323,174	45.20	31.31

## Forest Canopy (%)

Under 20% (no symbol)

▼ 20% - 40%

▼ Over 40%

Note: Forest Canopy (%) is the ratio of total upper leaf surface of vegetation to the surface area of the land on which the vegetation grows. Here, it is used as an approximation for the census tract greenness.

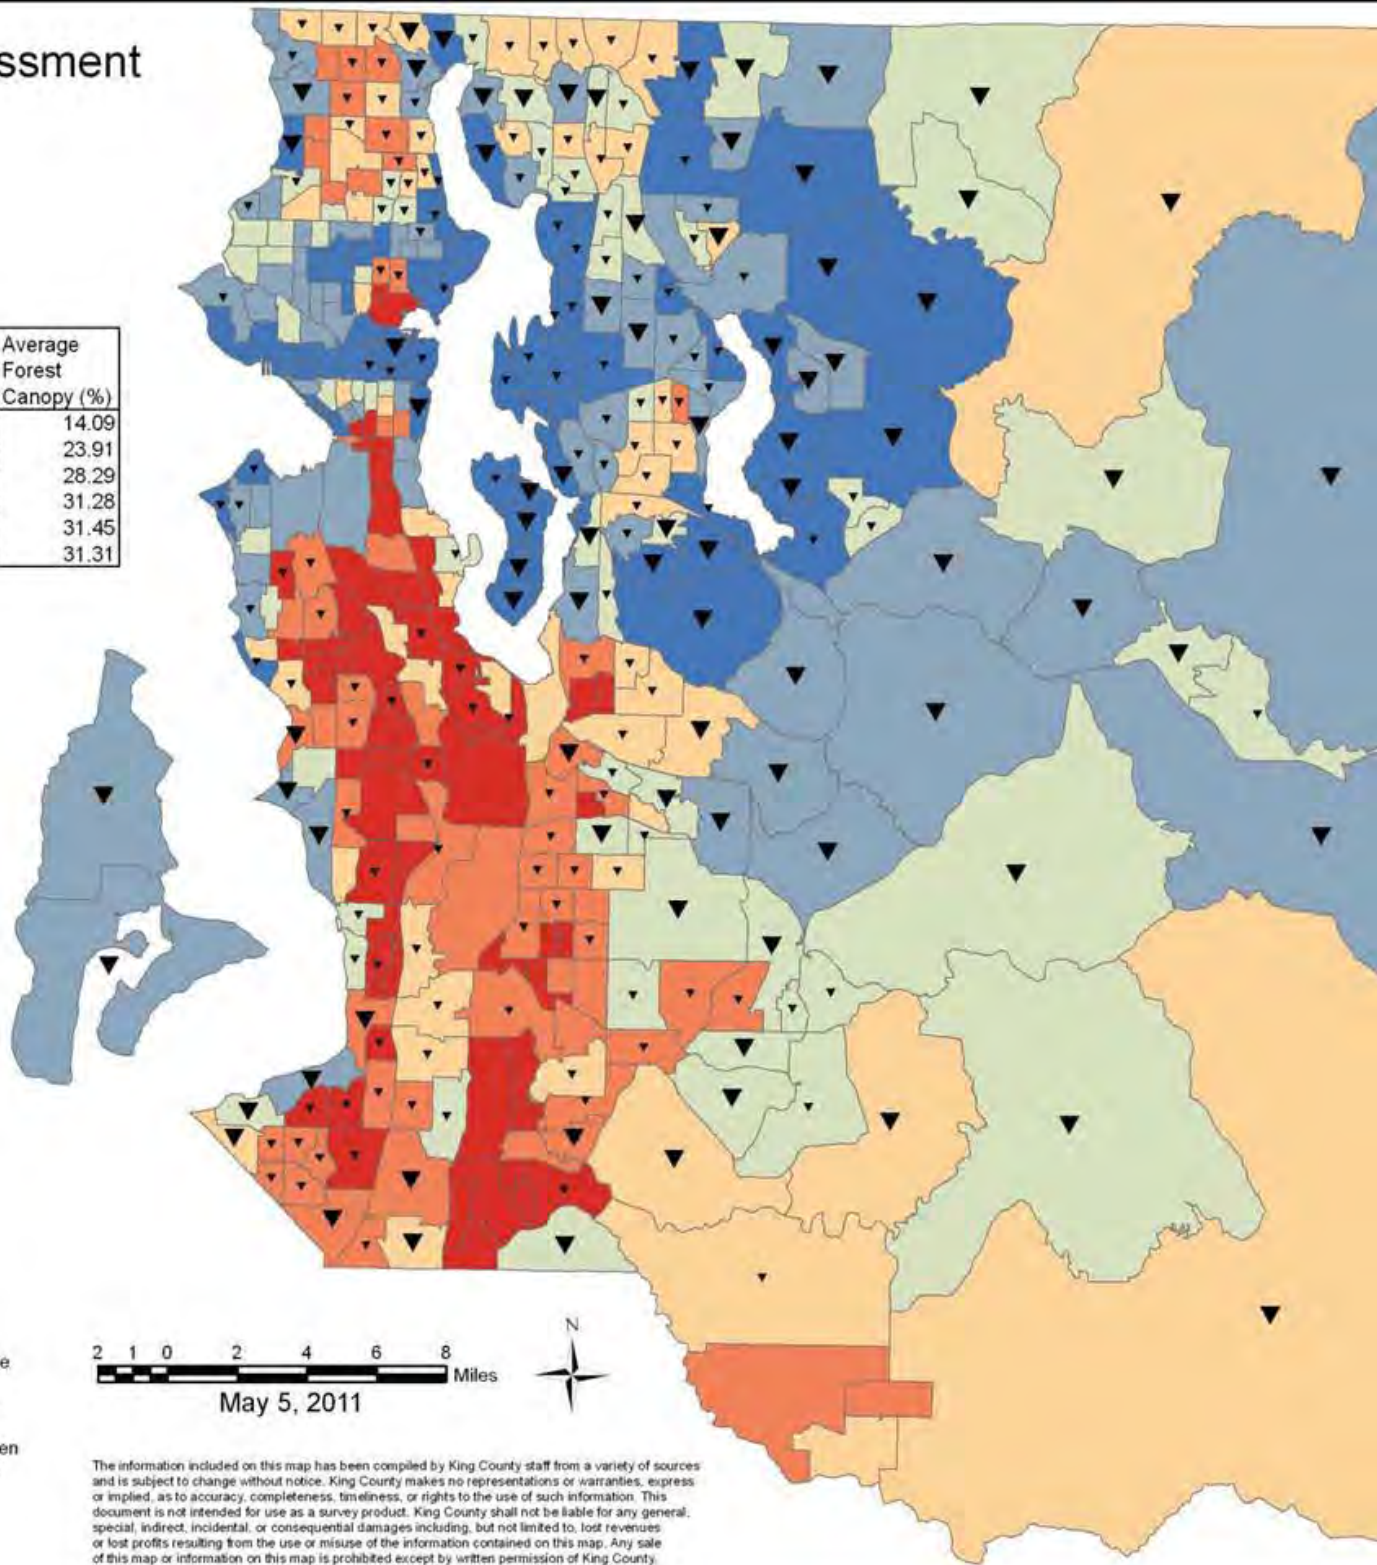

GIS Center

Data Sources:  
Forest Canopy Data: U.S. Geological Survey 2003, King County GIS Center  
Demographic Data: American Community Survey '05-'09  
reported by Census 2000 Tracts

### Note:

The American Community Survey is a small sample and margins of error may be high. These data should be used with caution as showing a generalized spatial distribution. The margin of error for income in the census tracts varies between \$1,295 and \$31,651. Income and population distribution within census tracts was treated as being even. The annual income per capita (in 2009 inflation-adjusted dollars) for whole King County is 37,797 US\$.

- + The 50 tracts with highest increase of NDVI value ( $>+0.0018$ )

GIS Center

Data Sources:  
NDVI Data: U.S. Geological Survey 2000, 2009  
Demographic Data: American Community Survey '05-'09  
reported by Census 2000 Tracts

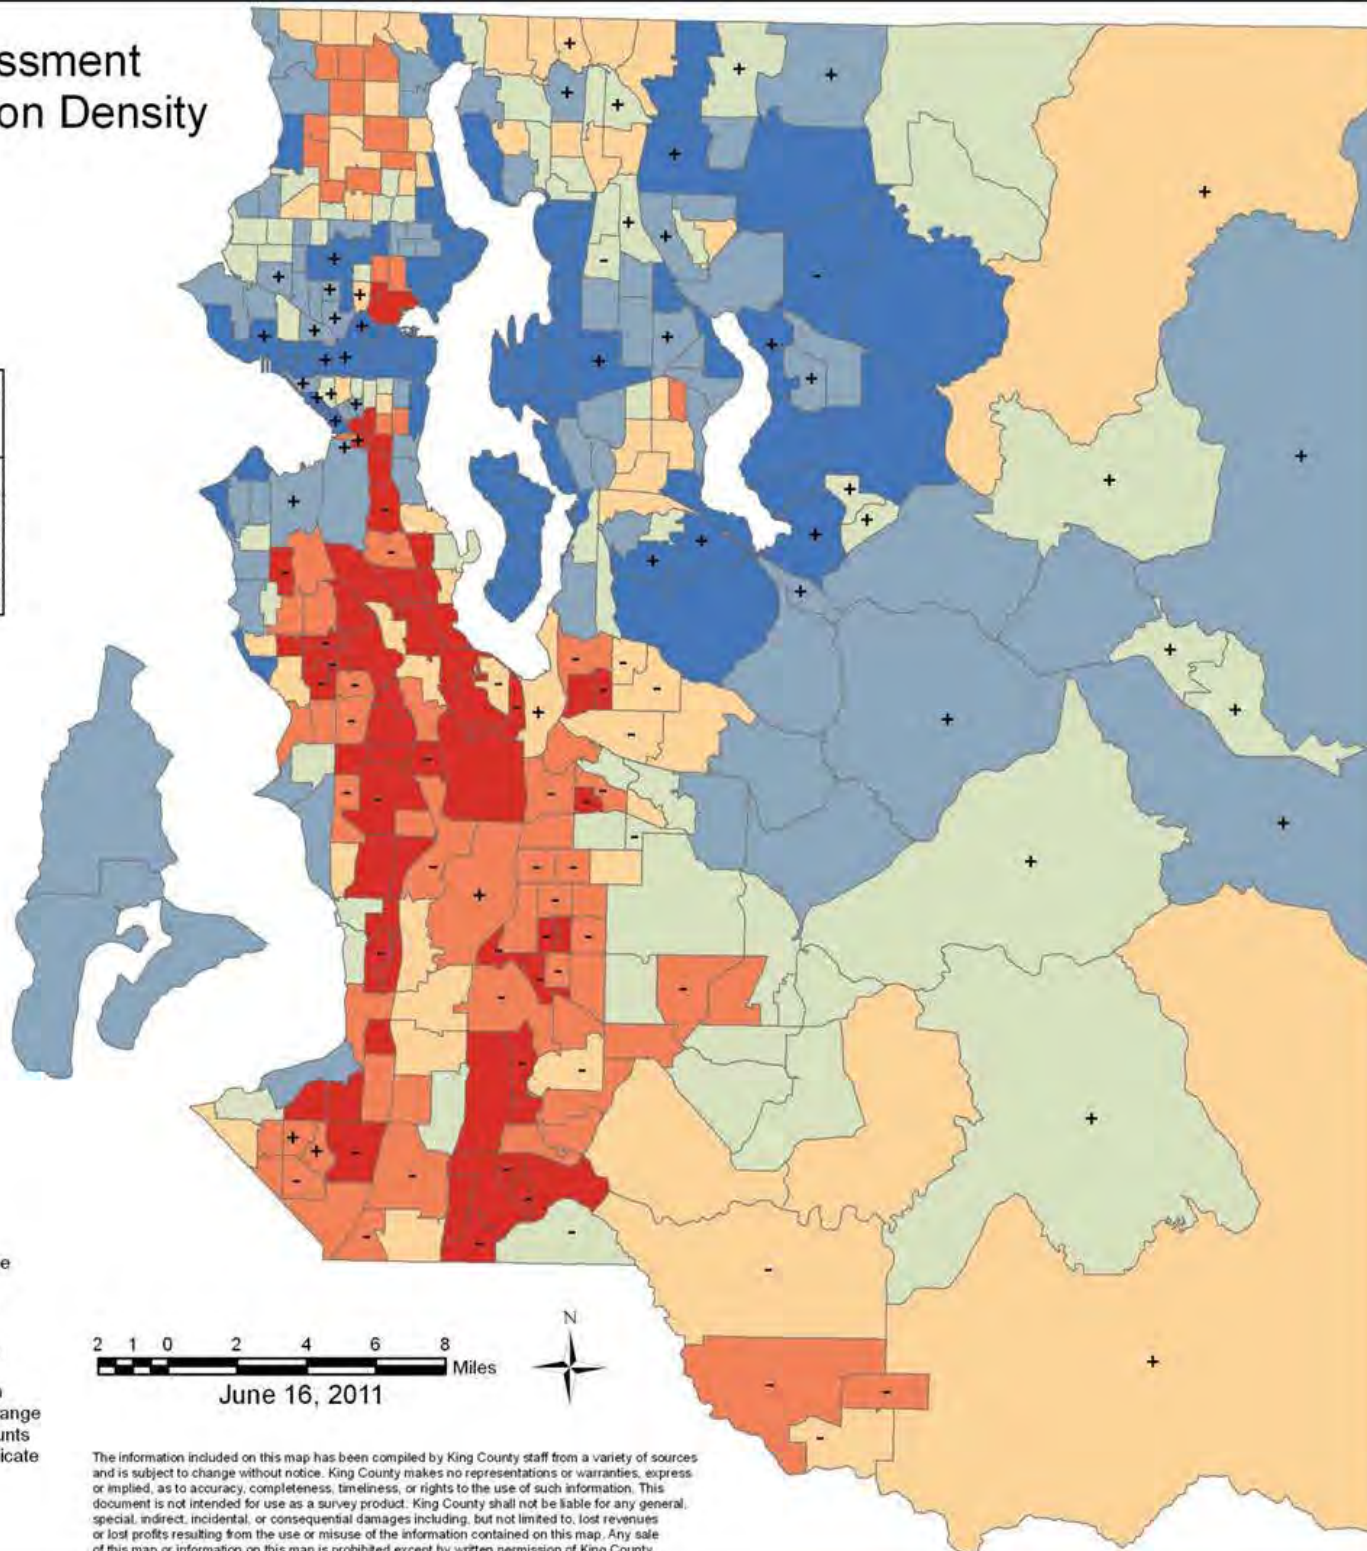

Note:

The American Community Survey is a small sample and margins of error may be high. These data should be used with caution as showing a generalized spatial distribution. The margin of error for income in the census tracts varies between \$1,295 and \$31,651.

The annual income per capita (in 2009 inflation-adjusted dollars) for whole King County is 37,797 US\$.

The Normalized Difference Vegetation Index (NDVI) is a measure for vegetation cover and biomass production derived from multispectral satellite data. Values range between -1.0 and 1.0. Increasing positive NDVI values indicate increasing amounts of green vegetation. NDVI values near zero and decreasing negative values indicate non-vegetated features such as barren surfaces and water.

Data source: ACS 2011, B19013

# Summary

	INCOME	DIVERSITY	ACCESS	"CCC"	NOTES
<b>Shoreline</b>	 mid	 mid	 mid	 low	Woodsy residential, traditional place to raise a family
<b>Capitol Hill</b>	 low	 low	 high	 high	Quintessential urban design, has experienced gentrification over last 30 years
<b>Tukwila</b>	 low	 high	 low	 low	Great access to commercial services & transit for diverse community; affordable commercial space

# Takeaways

Capitol Hill: affordable and great CCC,  
but low diversity

Source: American Community Survey, 2006-2010

*Growing Transit Communities Partnership*

*Existing Conditions Report V: Housing and Housing Affordability | May 2013*

- A great built environment does not preclude affordable housing.
- Families and diverse populations
- Continue affordable housing policies (in UDF and ST property developer agreements)

# Shoreline: mid/high access to resources, mid/high level of diversity, poor CCC

- Station area siting makes CCC points difficult to achieve
- Resource-rich area good for affordable housing
- Long-term risk of displacement

Source: King, Pierce County Assessor Data, 2011; Dupre + Scott Spring 2011 Apartment Survey; U.S. Department of Housing and Urban Development, Washington State Department of Commerce, Washington State Housing Finance Commission, Pierce County, King County, City of Tacoma, City of Seattle

**Growing Transit Communities Partnership**

**Existing Conditions Report V: Housing and Housing Affordability | May 2013**

# Tukwila: highest diversity, poor pedestrian environment, great commercial atmosphere

- Businesses and residents vulnerable to displacement (PSRC's Community Typology report)
- "Poor" urban design is not hurting existing businesses, and perhaps fostering them
- Carefully improve pedestrian environment if desired by community
- Over half of households have moderate to severe housing cost burden. Increase affordable housing, esp. for families.

# Built Environment and Social Equity

## A STAR assessment of 3 King County station areas

**Opportunity Mapping**

Equity, Opportunity, and Sustainability in the Central Puget Sound: A Study of the Region's Geography of Opportunity

WA APA  
October 2, 2013

Puget Sound Regional Council  
PSRC

Transit Communities

Red State  
Many Differences One Destiny

Kirwan Institute

GROWING TRANSIT COMMUNITIES

**Growing Transit Communities Partnership**

**Implementation of regional plans**

**Regional initiative housed at PSRC**

- \$5 million grant from Partnership for Sustainable Communities

**Diverse coalition to promote thriving and equitable transit communities**

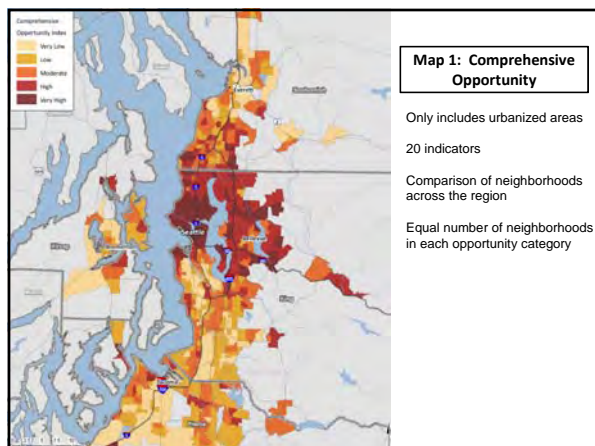

**Opportunity Defined**

- "Opportunity" is a situation or condition that places individuals in a position to be more likely to succeed or excel.
- Opportunity structures are critical to opening pathways to success:
  - High-quality education
  - Healthy and safe environment
  - Stable housing
  - Sustainable employment
  - Political empowerment
  - Outlets for wealth-building
  - Positive social networks

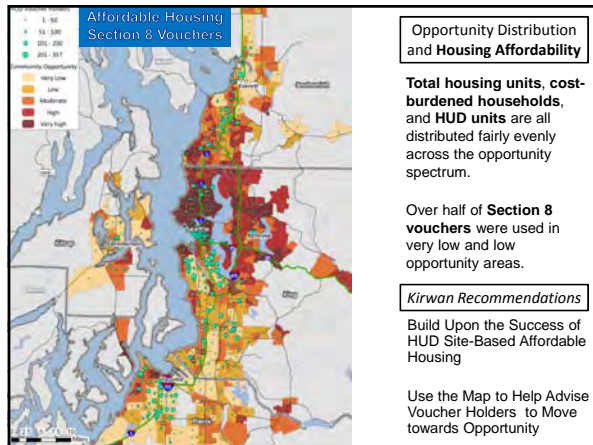

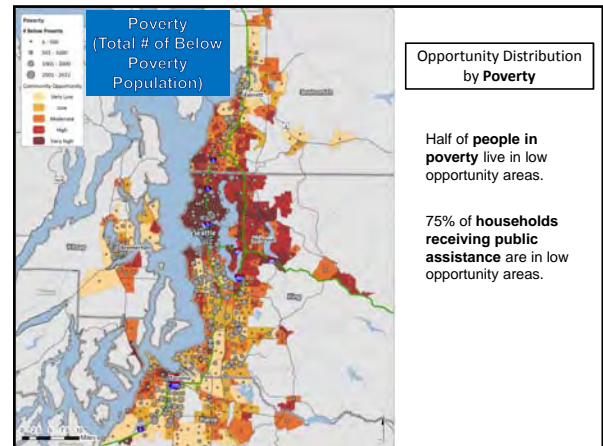

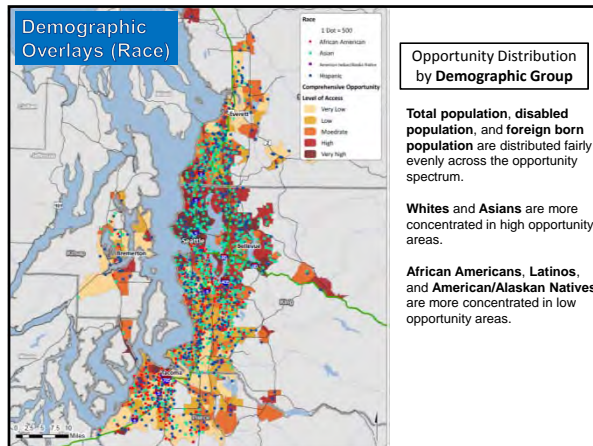

**Central Puget Sound Indicators of Opportunity**

Education	Economic Health	Housing & Neighborhood Quality	Mobility/Transportation	Health & Environmental
Reading Test Scores (4 <sup>th</sup> Grade)	Access to Living Wage Jobs	Housing Vacancy Rates	Transportation Cost: Cost per commute	Distance to nearest park or open space
Math Test Scores (4 <sup>th</sup> Grade)	Job Growth Trends; % Change in Jobs from 2000-2010	Housing Stock Condition	Transit access; Proximity to Express Bus Stops	Toxic waste; Proximity to Toxic Waste Release
Student Poverty	Unemployment Rate	Foreclosure Rate	Average Transit Fare Cost	Access to healthy food; percent of tract in food desert
Teacher qualifications		High Cost Loan Rate	Walkability; % of commutes by walking	
Graduation Rate		Crime Index		

**Approaches to improving opportunity**

- Increase accessibility of low opportunity neighborhoods to higher opportunity neighborhoods.**  
*For example: Transit investments and funding should seek to connect high and low opportunity neighborhoods.*
- Direct affordable housing investments to higher opportunity areas.**  
*For example: Section 8 voucher holders receive a higher value voucher for use in high opportunity neighborhoods.*
- Direct investments in education, health, and safety to lower opportunity neighborhoods.**  
*For example: Focus regional public health effort on low opportunity neighborhoods.*

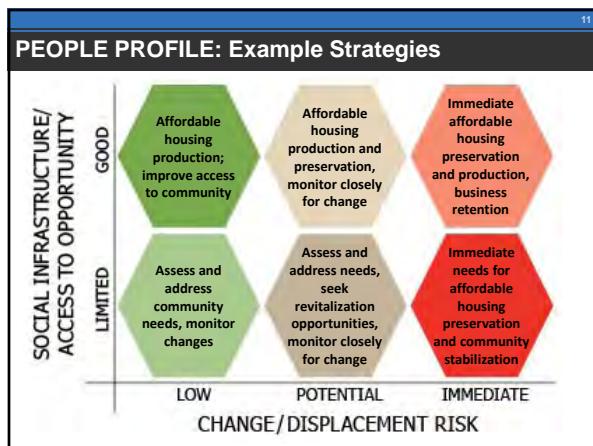

### Using opportunity maps in Puget Sound Region

#### Fair and Affordable Housing

- Results will be incorporated into a regional Fair Housing & Equity Assessment (FHEA)
- Housing authorities promote 'move to opportunity' for Section 8 voucher holders
- Prioritize housing resources in high opportunity areas

#### Regional Planning

- Transportation project prioritization
- Bicycle route prioritization
- Prioritize recommendations for transit communities (i.e. station area typology)

### Lessons Learned from mapping opportunity

- Regional map works as a conversation starter about social equity
- Important to break down the 'comprehensive index' into meaningful information (online maps work great)
- Calling neighborhoods low and high opportunity areas creates controversy. Be ready to back it up with data.

**Using opportunity maps in Puget Sound Region**

**King County Housing Authority**

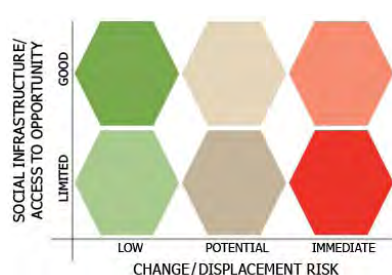

- Resolution 5382. May 9, 2012

*The Board of Commissioners of the Housing Authority of the County of King hereby directs the staff to give strong consideration to Opportunity Neighborhood indicators, such as education, employment, access to food, parks and transportation, when acquiring new properties, placing project-based Section 8 subsidies and developing mobility counseling and other programs and to integrate these criteria into the decision making on these programs to the maximum extent possible.*

- Currently 1/3 of KCHA's housing investments are located in high or very high-opportunity neighborhoods, and over half are in low or low-quality neighborhoods
- Consideration of neighborhood quality when acquiring new properties and placing project-based vouchers

16

**Using opportunity maps in Implementation Typology**

**PEOPLE PROFILE**

17

**Change / Displacement Risk axis**

Based on UC-Berkeley Center for Community Innovation framework for measuring susceptibility to gentrification

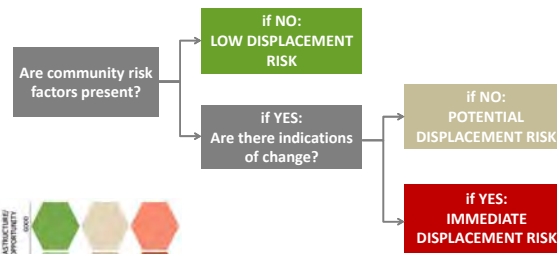

Nominal categories (low/ potential risk/ immediate risk) based on numerous indicators, including:

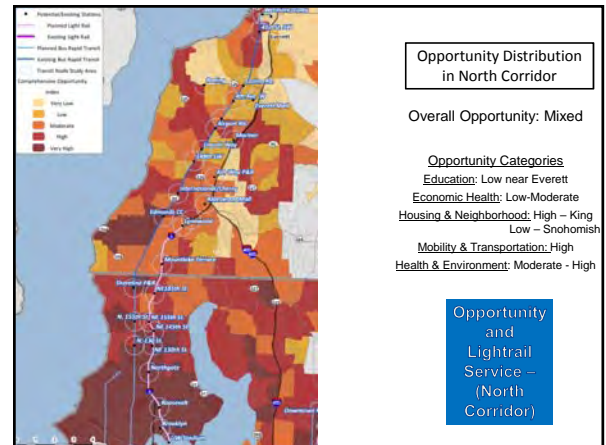

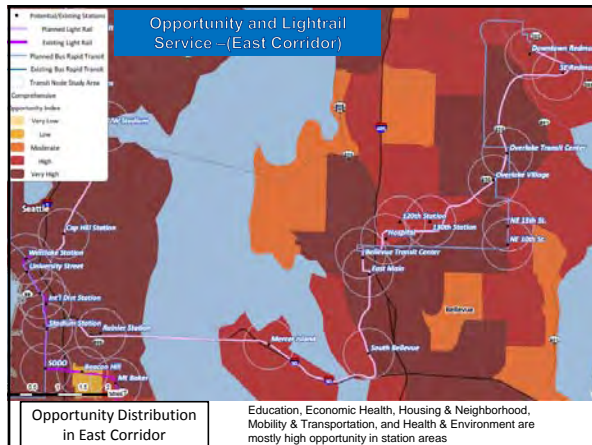

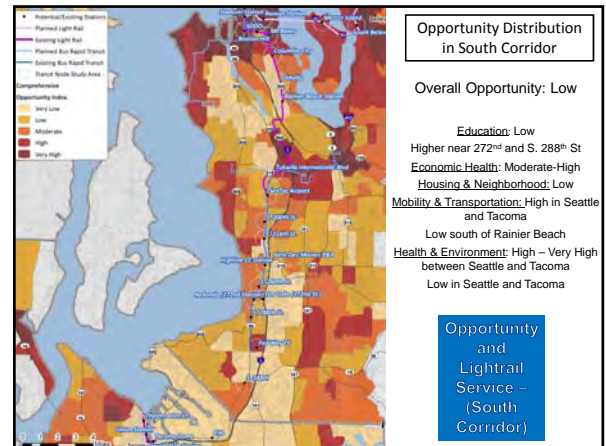

- Community Risk Factors
  - Demographics: race, income, education attainment, household type
  - Housing: tenure, cost burden
- Indications of Change
  - Recent demographic change (median income, education attainment, non-family households)
  - Market strength

## Session outline

- Equity, Opportunity, and Place
- Overview of Opportunity Mapping
- SCI and Growing Transit Communities
- Measuring Equity with the STAR Rating System
- Case Study: Development Without Displacement

## What do we mean by “equity”?

- Inter-generational environmental stewardship
- Basic human rights and opportunities for people living today
- Investing in human capital for regional equity, competitiveness, and sustainability

## The components of place

## Place Matters: space, race, and opportunity

- Opportunity is a situation or condition that places individuals in a position to be more likely to succeed or excel
- Opportunity structures are vital to combating the impact of poverty, creating strong neighborhoods and an environment in which children can become successful adults.

## Place and equity

### Built

- Land Use
- Architecture
- Transportation
- Scale
- Quality
- Condition

### Social

- Political
- Economic
- Cultural
- Demographic
- Organizational
- Institutional

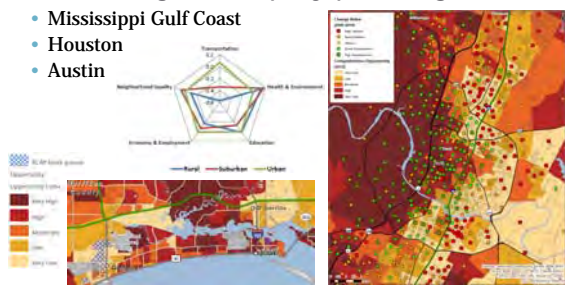

## Using mapping to understand place and opportunity

- The Kirwan Institute pioneered "Opportunity Mapping" 10 years ago
- Multi-dimensional index at the neighborhood level
- Relative measure of opportunity across cities, regions, and states
- Vividly illustrates community inequities
- Valuable tool for informing place-based initiatives as well as mobility programs

## How opportunity mapping is being used in regional equity planning

- Mississippi Gulf Coast
- Houston
- Austin

## SCI and Growing Transit Communities

- The Sustainable Communities Initiative (SCI)
- HUD's new approach to affirmatively furthering fair housing: FHEA and RAI
- The process of developing a Puget Sound opportunity index
- Ways opportunity mapping is being used to build equity into the region
- Lessons learned and future opportunity initiatives

## Opportunity Mapping

Equity, Opportunity, and Sustainability in the Central Puget Sound: A Study of the Region's Geography of Opportunity

PSRC

Growing Transit Communities

Kirwan Institute  
Many Differences One Destiny

## Implementation of regional plans

### Regional initiative housed at PSRC

- \$5 million grant from Partnership for Sustainable Communities

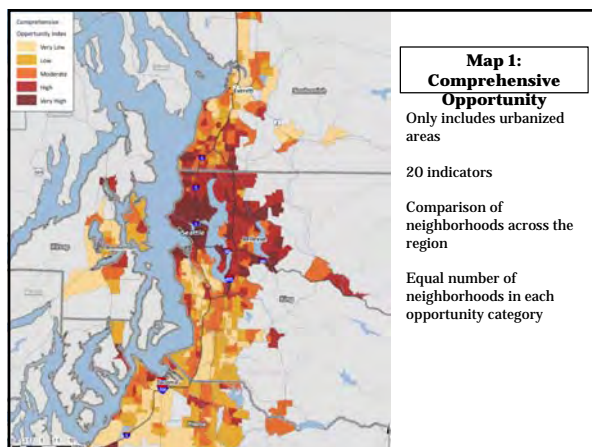

### Diverse coalition to promote thriving and equitable transit communities

- “Opportunity” is a situation or condition that places individuals in a position to be more likely to succeed or excel.
- Opportunity structures are critical to opening pathways to success:
  - High-quality education
  - Healthy and safe environment
  - Stable housing
  - Sustainable employment
  - Political empowerment
  - Outlets for wealth-building
  - Positive social networks

Education	Economic Health	Housing & Neighborhood Quality	Mobility/Transportation	Health & Environmental
Reading Test Scores (4 <sup>th</sup> Grade)	Access to Living Wage Jobs	Housing Vacancy Rates	Transportation Cost; Cost per commute	Distance to nearest park or open space
Math Test Scores (4 <sup>th</sup> Grade)	Job Growth Trends; % Change in Jobs from 2000-2010	Housing Stock Condition	Transit access; Proximity to Express Bus Stops	Toxic waste; Proximity to Toxic Waste Release
Student Poverty	Unemployment Rate	Foreclosure Rate	Average Transit Fare Cost	Access to healthy food; percent of tract in food desert
Teacher qualifications		High Cost Loan Rate	Walkability; % of commutes by walking	
Graduation Rate		Crime Index		

1. Increase accessibility of low opportunity neighborhoods to higher opportunity neighborhoods.

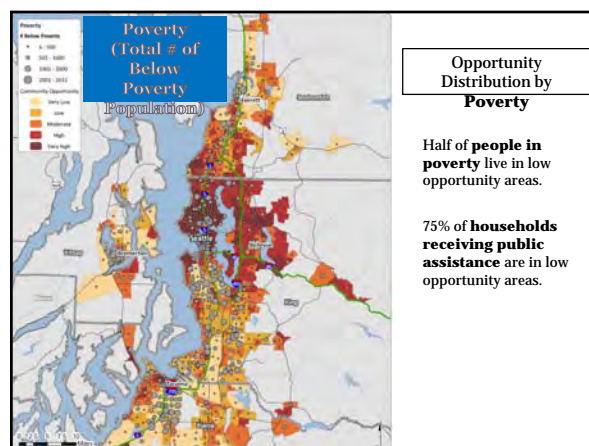

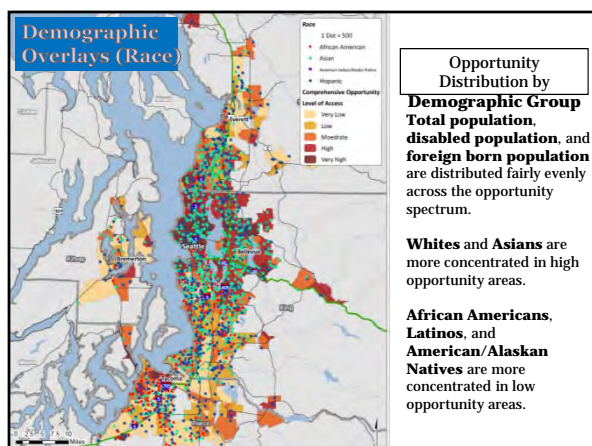

*For example:* Transit investments and funding should seek to connect high and low opportunity neighborhoods.

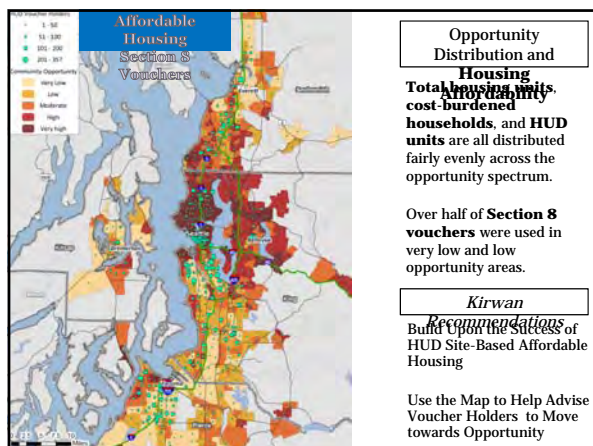

2. Direct affordable housing investments to higher opportunity areas.

*For example:* Section 8 voucher holders receive a higher value voucher for use in high opportunity neighborhoods.

3. Direct investments in education, health, and safety to lower opportunity neighborhoods.

*For example:* Focus regional public health effort on low opportunity neighborhoods.

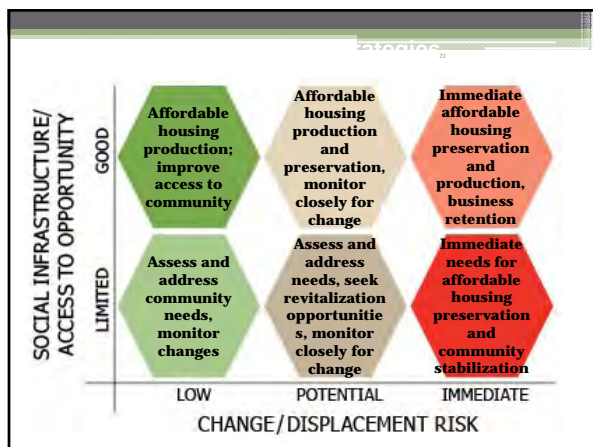

### Fair and Affordable Housing

- Results will be incorporated into a regional Fair Housing & Equity Assessment (FHEA)
- Housing authorities promote 'move to opportunity' for Section 8 voucher holders
- Prioritize housing resources in high opportunity areas

### Regional Planning

- Transportation project prioritization
- Bicycle route prioritization
- Prioritize recommendations for transit communities (i.e. station area typology)

- Regional map works as a conversation starter about social equity
- Important to break down the 'comprehensive index' into meaningful information (online maps work great)
- Calling neighborhoods low and high opportunity areas creates controversy. Be ready to back it up with data.

# EXTRA SLIDES

### King County Housing Authority

- Resolution 5382. May 9, 2012

*The Board of Commissioners of the Housing Authority of the County of King hereby directs the staff to give strong consideration to Opportunity Neighborhood indicators, such as education, employment, access to food, parks and transportation, when acquiring new properties, placing project-based Section 8 subsidies and developing mobility counseling and other programs and to integrate these criteria into the decision making on these programs to the maximum extent possible.*

- Currently 1/3 of KCHA's housing investments are located in high or very high-opportunity neighborhoods, and over half are in low or low-quality neighborhoods
- Consideration of neighborhood quality when acquiring new properties and placing project-based vouchers

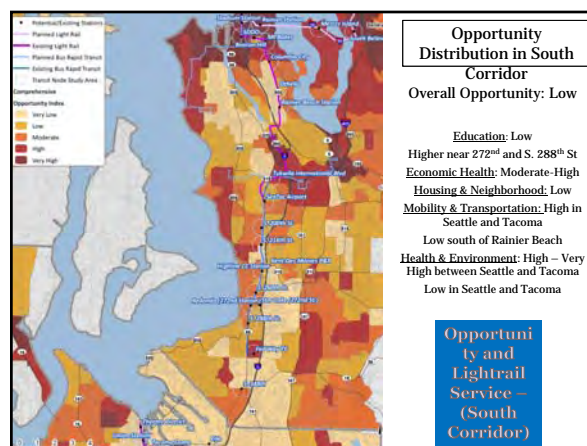

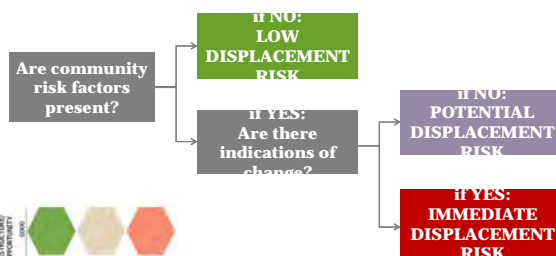

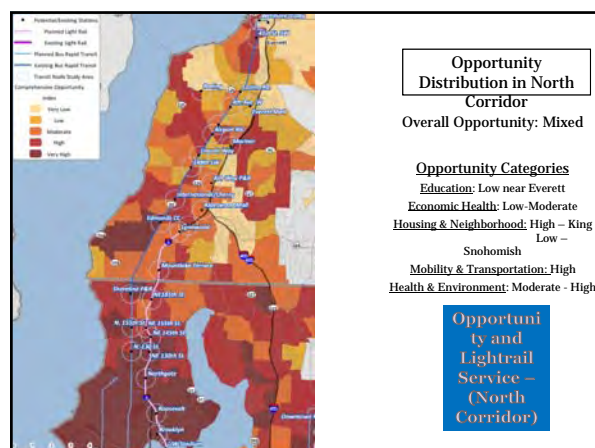

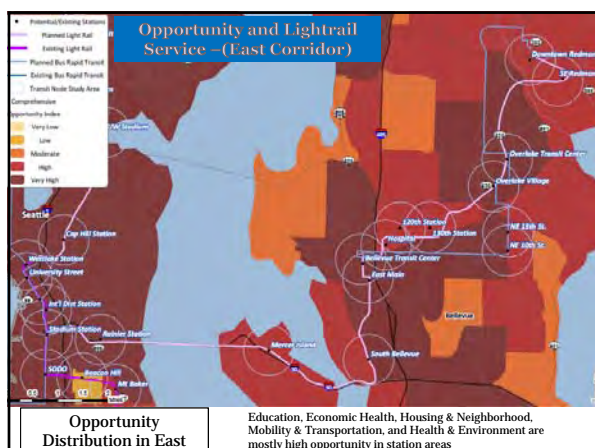

### PEOPLE PROFILE

Based on UC-Berkeley Center for Community Innovation framework for measuring susceptibility to gentrification

Nominal categories (low/ potential risk/ immediate risk) based on numerous indicators, including:

- Community Risk Factors
  - Demographics: race, income, education attainment, household type
  - Housing: tenure, cost burden
- Indications of Change
  - Recent demographic change (median income, education attainment, non-family households)
  - Market strength

## Using STAR to measure equity

- What can data tell us about equity and the built environment?
- The STAR rating system
- Equitable land use and access
- Case Studies:
  - Capitol Hill
  - Shoreline
  - Tukwila

### • Case Study: Weinland Park

- Engage the community from the beginning: WPCCA
- Build a strong network of partners: The Collaborative
- Lock down affordable housing from the beginning: Broad Street Portfolio
- Be strategic about creating affordable housing at all intervals: LIHTC, Habitat, NSP, CLT, etc

### • Case Study: Weinland Park

- Work on multiple fronts simultaneously: opportunity is dynamic
  - Housing
  - Food and Health
  - Youth Engagement
  - Education
  - Job Training
- Prepare the community in advance for the opportunities that will develop:
  - South Campus Gateway and the need for job-ready workers
  - Lease-to-own homes and the need for credit-qualified renters
  - The new Kruger and neighborhood employment recruitment

### • Case Study: Weinland Park

- Be able to adjust to the changing impacts of equity
- Don't let failures derail the vision of equity and inclusion

#### Conclusion

- Successful and sustained equity planning requires focused, intentional commitment
- Planning for development without displacement is a challenging and ongoing endeavor
